

SPM WALL PROTECTIONS
AND HANDRAILS

Hospitals, clinics, retirement homes, specialised centres, your infrastructures
represent your working tool and assets.

You work in an environment in which movement represents a risk:
risk of shock, falls, impact.

Each of your needs has been studied with your teams
(nursing staff, hygienists, technical teams, etc.)
and your partners (architects, fitters, quantity surveyors, etc.).

Thanks to this ongoing cooperation,
Gerflor has developed effective solutions, suited to your needs.

▶ WE OFFER SOLUTIONS FOR ALL YOUR NEEDS

HYGIENE AND DECONTAMINATION

- 100% antibacterial (reports by Nosoco.tech)
- 100% decontaminable (tests by Anios and Institut Pasteur)
- 100% watertight with the hot-welded Decochoc / vinyl floor system

ENVIRONMENT

- Exemplary composition (no heavy metals, very low VOC emissions, etc.)
- 100% recyclable range
- Lower environmental impact during installation and use

RESISTANCE

- Resistance to impacts, shocks and scratches
- Resistance to tearing (CSTB test No. BP13-6-4042-2)

MAINTENANCE

- Easy care and cleaning
- Lower maintenance costs

EASY AND QUICK INSTALLATION

- Suitable for installation by a technician
- Limited installation-related nuisances and disturbances: installation while in use (solvent-free glue, etc.)

LONGER SERVICE LIFE

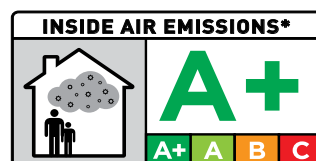

- Increase building service life
- Avoid repainting and repairing damaged areas

ATTRACTIVE AND DECORATIVE

- Wide selection of colours and decorative cut-outs
- Enhancement of buildings through easier maintenance

▶ WE ADDRESS ALL YOUR DEMANDS

* Information about the emission level of volatile substance in inside air, involving a toxic risk by inhalation, on a scale from A+ (very low emissions) to C (high emissions).

PRODUCT INNOVATION

Gerflor is constantly innovating to continue to meet your needs. Discover the latest new products from the wall protections and handrails expert.

▶ 40 COLOURS AND DECORS

An extended palette of 40 colours and decors, that are both versatile and varied, in order to offer greater choice whilst allowing for tonal matching or contrast.

▶ RAPID'SYSTEM

Rapid'System solutions for handrails with:

- Rapid'Angle for staircases and corners
- Rapid'Access for service ducts

Rapid'Angle

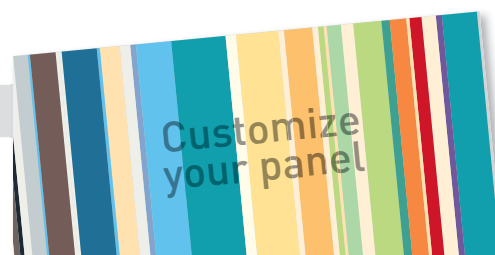

Rapid'Access

Patents pending

▶ DECOPRINT

Decoprint panel to protect and personalise your walls and doors (reproduction of photos, drawings, messages, logos, etc.)

▶ DECO CARE

Decocare panel

Hand hygiene to combine the hand-washing procedure with effective protection of the walls above sinks

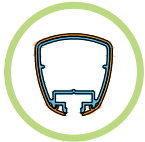

▶ LINEA RANGE

A new range combining design, ergonomics and performance with confirmed effectiveness.

DEVELOPED
WITH OUR PARTNER
ARCHITECTS

- A handrail with a uniform design throughout the building, whatever the level of protection required
- Exclusive trilobed shape recommended by ergonomists for optimised grip, support and guidance
- Large selection of accessories and colours for endless combinations

HIGH-TRAFFIC CORRIDORS

PROOF AGAINST IMPACTS

Whether in hospitals, clinics, retirement homes or specialised centres, continuous personal and wheeled equipment traffic in the wards increases the frequency of impacts considerably. Walls and their protruding parts, edges, are subject to direct impacts by trolleys, stretchers or beds travelling through corridors. Wide open doors are also regularly damaged, particularly on the edges and frames. Finally, patients moving around generally have reduced mobility; aiding them in their mobility and ensuring their safety remain a priority.

MODERATE-TRAFFIC CORRIDORS

PROTECT AND GUIDE

Moderate-traffic corridors are often used to get around buildings such as retirement homes, geriatric wards, nursing homes and specialised facilities. Patients, nursing staff, visitors and also the wheeled equipment assigned to the ward (medical care, meals, laundry, etc.) travel through and meet in these corridors. For this reason, wall protection is required on the areas subject to the greatest risk, along with mobility aids.

PATIENT ROOMS

COMBINE COMFORT AND PROTECTION

In patient rooms, the major risk is associated with moving the furniture: variable-height beds, wheelchairs, chairs, tables are the main causes of damage. Visits from visitors and nursing or cleaning teams can all potentially cause impacts.

LIVING AREAS AND PANTRIES

PROTECTING YOUR ENVIRONMENT

In areas accommodating residents for their meals, leisure, in reception areas or in areas intended for the use of the nursing staff and service teams, facilities are subject to a wide array of risks: impacts caused by wheelchair and trolley traffic, friction due to the movement of chairs or tables, moving people, etc. The areas of impact and their extent are difficult to predict. For this reason, maximising surface protection is a priority.

OPERATING THEATRES AND STERILISATION

PRIORITY TO HYGIENE

In this highly sensitive sector, sanitary risk is still enemy number one. Surface coverings are subjected to the use of strong, corrosive chemicals and they need to be able to withstand these chemicals without any damage. In addition, full-height protection of the facilities is required, due to potential impacts caused by instrument trolley movements and incoming and outgoing stretchers.

LOGISTIC AREAS AND KITCHENS

HYGIENE AND PROTECTION ARE ESSENTIAL REQUIREMENTS

Hygiene and protection are essential requirements. In specialised or public health centres, from the kitchen to the laundry, including the areas used for waste, the requirements are the same. In these areas, wall protection needs to be effective in terms of care and high resistance, due to traffic of trolleys with very heavy loads.

Articulated link for service ducts. Made of antibacterial PVC with bactericidal joints.

Available for Escort only

Innovation Bactericidal joint

All SPM handrails are fitted with bactericidal joints, treated integrally and undamaged by cleaning, helping control hand-borne germ transmission, responsible for the majority of in-hospital infections (Nosoco.tech laboratories, test report No. 08112803)

PROTECT AND EMBELLISH

A PALETTE OF 31 COLOURS

Let wall protection play a dynamic role in decoration

Gerflor offers a range of colours, totally redesigned with the help of architects, interior designers, users, etc.

The colour chart extended to 31 colours, from the most sober to the most daring, gives a new identity to interior designs whilst blending perfectly with other decorative elements such as floors, walls, doors, etc.

The range brings together neutral, sober, mineral shades that blend naturally with architectural design and vivid, refreshing, full-bodied and youthful colours.

Tinted greys now appear in the palette to provide subtle, muted ambiances.

NEW

3 exclusive coloured greys for the protection and covering panel Decochoc.

Let Gerflor's wall protection play a dynamic role in the aesthetic appearance of your facility.

Please note

LRV (Light Reflectance Value) measures based on Decochoc panels.

In order to speed up delivery of your orders, we have adapted our colour range in line with our products:

- Most of our products are available in all 31 colours in the range.
- Certain products, however, are only immediately available in 15 colours, with the other 13 colours available on request*.
- The remaining products come in 5 colours with the other 23 colours available on request*.

* with a minimum order quantity
