Areas of use: domestic use

TEXLINE, UNROLL... IT'S DONE!

Economical, quick and easy to lay

- No subfloor preparation
- No glue

Saves extra costs

TEXLINE, COMFORTABLE UNDERFOOT

- Sound insulated
- Warmth underfoot

TEXLINE, ALL USES FLOOR

Waterproof: ideal for wet rooms

- bathroom, kitchen

Resistant: high traffic rooms

- living room, corridor

Easy to clean & hygienic

- living room, kids' bedroom

LAYING

Laying recommendation: Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:

The subfloor must be smooth, hard, dry and clean.

Unroll the floor covering 24 hours before it is due to be installed.

The floor covering should not be laid in rooms where the temperature is below 15°C.

Although Textline is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.

Can be installed on underfloor heating (up to 28°C).

Cold-weld the joints for perfect water-tightness.

Permanent laying: Use a single stick acrylic glue (approximately 250g/sqm) and a finely notched trowel and cold weld the joints.

Loose laying: Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

RENOVATION: Thanks to its special patented composition, Textline can be laid directly on most existing subfloors using loose laying.

On wooden floorboards and on ceramic tiles: Textline can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:

- up to 5 mm wide and a maximum depth of 1 mm in existing tiling
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): Textline can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: Textline can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.

A rough concrete surface should be treated with a smoothing compound beforehand.

CLEANING & CARE

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission
- No glue
- GFT backing: > 95% recycled fibres

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning
